EDUCATION BACKGROUND

Shanghai Jiao Tong University

Bachelor in Visual Communication Design (Information and Interaction) (GPA: 3.9/4.0)

Shanghai

Aug 2021 – Mar 2026

The Hong Kong Polytechnic University

Exchange in Interactive Media

Hong Kong

Aug 2023 – Jan 2024

WORK EXPERIENCE

Microsoft | *Product Manager, Intern*

Apr 2025 – Oct 2025

- Contributed to the GA launch and activation of Copilot 3D, an image-to-3D product on Copilot Labs, supporting growth tracking and content strategy that helped drive 28% UU growth and 90K+ 3D assets generated within one week of launch
- Built a benchmark-based 3D asset quality evaluation framework, translating subjective product quality expectations into measurable criteria across asset categories, quality thresholds, and evaluation workflows
- Partnered with ML and engineering teams to diagnose data, model, and pipeline issues through bad-case analysis, using evaluation insights to inform image-to-3D quality iteration priorities
- Independently designed and shipped Curio, an AI interactive MVP (OPE), delivering an end-to-end workflow from image processing to live multi-agent interaction, driving 100+ user activations and validating early demand through engagement data and user feedback
- Led AI Tourism product research with museum partners, translating field insights into product vision, feature roadmap, and pitch materials to advance AR-enabled experience development

Unity | *Product Manager, Intern*

Nov 2024 – Mar 2025

- Defined product scope for a shipyard digital twin PoC, translating ambiguous client needs into prioritized workflows for progress tracking, ship-block navigation, precision annotation, and data maintenance
- Designed a 3D-enabled platform unifying dockyard, ship model, and data views, reducing manual cross-checking across 2D drawings and Excel records by 40%
- Delivered 6 product specs, 30+ high-fidelity prototype screens, and a scalable component library; secured Unity internal review approval and moved the PoC into the development roadmap

Rednote | *Product Designer, Intern*

May 2023 – Aug 2023

- Redesigned enterprise tools including Talent Card and Organization Management Systems, using workflow analysis and stakeholder feedback to improve user satisfaction by 66.35%
- Partnered with PM, operations, and engineering to refine PRDs, map user flows, and monitor post-launch performance, improving requirement clarity and implementation quality

The Walt Disney Company | *Creative Designer, Intern*

Jan 2024 – Jul 2024

- Delivered 10+ licensing design packets across Disney properties, translating consumer trends, audience insights, and brand guidelines into production-ready creative assets
- Coordinated timelines across design, product, operations, and legal stakeholders, leading project check-in meeting that enabled 100% on-schedule delivery

EXTRACURRICULAR ACTIVITY

Outreach Department, Student Union | *Minister*

- Facilitated cross-departmental collaboration and secured external sponsorships, organizing large-scale networking events with over 1,000 participants, driving engagement and strengthening campus connections

Micro-Nano Laboratory, Shanghai Jiao Tong University | *Research Assistant*

- Analyzed and visualized data using Excel to support interdisciplinary research and enhance findings presentation
- Designed and managed promotional materials, including WeChat articles and presentations, to effectively communicate research outcomes to diverse audiences

TECHNICAL SKILLS

Product & Analytics: AI MVP Prototyping, PRD writing, User research, A/B testing, Funnel analysis

Programming: Python, SQL, JavaScript, HTML/CSS

Tools: Azure OpenAI, Git, VS Code, Figma, Unity, Blender, Rhino, Adobe Creative Suite (Photoshop, Illustrator, After Effects, InDesign)
